research
consultation
planning
realization
marketing
operation

Infrastruktur- und
Projektentwicklungsgesellschaft mbH

IPG: firsthand service provider

IPG's services focus on a broad range of infrastructure and transport development:

- strategic concept for problem-solving
- feasibility study
- business calculation
- financing
- planning
- realization
- project control
- project documentation

IPG: modular and scalable services

IPG's service offer consists of individual components which will be made-to-measured solutions according to the type of the project. All components are provided for projects of different sizes: ranging from the reconstruction of railway stations via the revitalization and conversion of industrial contaminated areas up to the development of modern logistic centres and freight villages.

IPG: make use of networks

Based on numerous project developments IPG disposes of well-developed networks and co-operations with many important institutions like ministries, banks, research institutions and partners from the transport industry.

IPG: experiences have been included

IPG's 20 employees have been working in infrastructure and transport projects for years. The team has been composed of experts of very different disciplines. Thus, specialised partners are available to manage complex and demanding tasks. Over the last years, the IPG team has implemented more than 40 projects.

IPG: references
